

We've redesigned the Water Safe System™

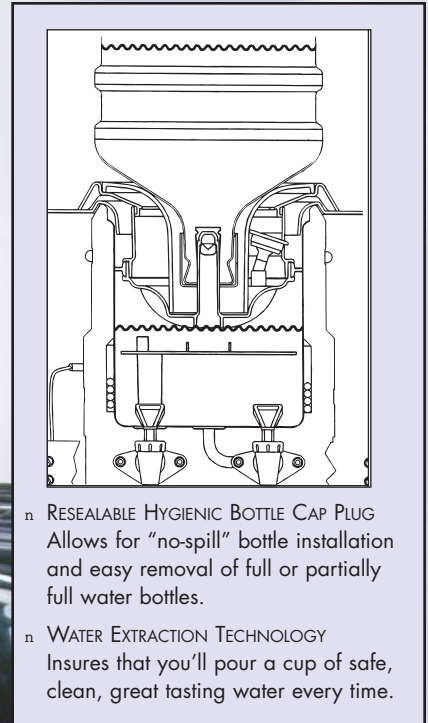

Do you and your employees a favor, gently tilt back the 5 gallon water bottle to one side and take a good look at your water tank. The neck of the bottle is completely immersed in your quality water.

Road grime and smog from transporting germs from personnel delivering and handling exposure to the airborne contaminants in your workplace all help to make your water tank a breeding ground for germs and other contaminants. The

"Quality" that you've invested time and money on has been contaminated with every bottle exchange.

Pure Choice Water Systems has the answer to this common bottled water service problem.

Specifications: **H** **W** **D**
Signature 21 38 13 18
HRCB or RCB 38 13 18

H 37" W 15" x 22"
Bottle Height is 18"
