

Quality Drinking Water from a Quality Provider...and it's BOTTLE-LESS!

In addition to office coffee, *firstCHOICE* Services offers a variety of *innowave*® point-of-use water treatment systems to hydrate you all day long.

The Power of UV Light

innowave® point-of-use systems are equipped with ultra violet (UV) light technology. Either by in-tank sanitization (ITS™) or recirculating UV light, our systems provide an effective method to prevent the potential for biofilm (slime) buildup in the storage tank after chlorine has been reduced through filtration or reverse osmosis pre-treatment. Ultra violet technology also helps reduce any heterotrophic bacteria that may occur in drinking water. This ensures high-quality drinking water and peace of mind.

Decrease Bacteria

Bottled water coolers have exposed reservoirs that can become contaminated if not sanitized on a routine basis. Someone's hands may be dirty when they are handling and changing bottles, which can actually recontaminate the water you drink. *innowave*® systems offer your employees better protection from bacteria with a self-contained, point-of-use system treated with UV light.

Improve Employee Wellness

According to an article in the American Journal of Public Health, 35% of all gastrointestinal illnesses are water-related and preventable. Quality water from *innowave* is a good start to a healthier, happier employee.

Minimal Manpower

No bottles means no work for you. *innowave*® point-of-use systems reduce the risk of injuries and workers' compensation claims associated with lifting heavy bottles. To save you time and money, periodic preventative maintenance is performed by a qualified *firstCHOICE* service technician.

Increase Security by Reducing Deliveries

Many companies today are focusing on building security. By decreasing the number of unknown personnel on your premises, you are contributing to the safety and security of your workplace. Additionally, delivery trucks are not blocking entries, nor are you using up valuable space by storing water bottles. Traffic from delivering bottles is a thing of the past!

firstCHOICE Services is your one-stop shop for your beverage necessities. We would like to be your drinking water provider and discuss these options with you.
